

KIDS SIMULATION AUSTRALIA

Course Overview:

This course is all about managing the paediatric airway. For those who feel like experts or need a refresher, or for those who work with children all the time or just see them occasionally; this is a whole day devoted to providing better care to children. This one day program focusses on what is really different about the paediatric airway, the latest evidence on safely managing a paediatric airway, as well as tips and tricks from experienced paediatric experts. This hands-on, interactive course will include time for discussion, time for hands on skills and lots of teamwork and simulation to invigorate your practice.

Learning Objectives:

1. To understand the particular challenges of paediatric airway care.
2. To revise the basic assessment and management skills that underpins excellent airway care.
3. To develop advanced airway techniques that can help you look after your paediatric patient.
4. To develop the teamwork skills that will make you a more effective clinician.

Who Should Attend?

This course is aimed at both doctors and nurses involved in anaesthetic and/or critical care specialties who are involved in airway care. You do not need to be working at a tertiary paediatric centre or doing full-time paediatrics to be a part of this course.
