I am going to see the doctor.
It's our turn to see the nurse or doctor.
I stand on the weigh scales.
The nurse will measure me. I will stand still.
The nurse puts a special cuff on my arm to measure my blood pressure.
The nurse puts a special probe with a on my finger.
The nurse will put the thermometer under my arm. She will take my temperature.
I lie on the bed. The doctor will press on my tummy.
The doctor will listen to my heart with a stethoscope.
The doctor will use a torch to look in my ear.
The doctor looks in my mouth.
I open my mouth up wide!
The doctor uses another torch. The doctor looks at my eyes.
The doctor measures my head.
The doctor taps my knees and my arm. It makes my legs and arms move!
All finished.
How am I feeling?
