Paediatric Neuro-critical Care: beyond BASIC

The course is a one-day programme focusing on managing paediatric patients with acute brain injury or at risk of neurological problems. The focus of the course will be on structured assessment, communication, neuro-resuscitation, neuro-protection and neuro-monitoring to guide management of these patients. Emphasis will be placed on brain-directed critical care from presentation at hospital through to discharge from PICU.

Date: 26 September 2019         Time: 8am to 5:30pm
Cost: $300 for doctors, $150 for nurses
Venue: Sim Centre, Children’s Hospital at Westmead, Sydney Australia

Audience:

Some experience in looking after critically unwell children is required.

- Intensive care physicians and trainees
- Emergency Department physicians and trainees
- ICU/Emergency Department nurses

Program:

Keynote lectures

- Refractory status epilepticus
- Resuscitation post-cardiac arrest including targeted temperature management
- Acute Ischaemic Stroke
- Neuroprognostication
- Neuroimaging: How to recognise life-threatening neurological emergencies
- EEG for critical care staff

Faculty:

Dr Nitesh Singhal Paediatric Intensivist, The Children’s Hospital at Westmead.
Dr Elena Cavazzoni Paediatric Intensivist, The Children’s Hospital at Westmead.
